Burdwan, West Bengal, India

Summary

Full-Stack Developer and Computer Science final-year student (Expected Graduation: May 2027, CGPA: 8.6) with hands-on experience in software engineering and 4 shipped production products. Proficient in React.js, Next.js, TypeScript, Node.js, PostgreSQL, and Generative AI integration. Adept at problem-solving and technical communication, comfortable driving the full delivery lifecycle from architecture and API design to CI/CD pipelines and deployment.

Education

University Institute of Technology, The University of Burdwan **Expected Graduation: May 2027**
B.E. in Computer Science & Engineering *Current CGPA: 8.6 (Till 5th Semester)* *Burdwan, West Bengal*

Technical Skills

Languages	TypeScript, JavaScript, C, C++, Python
Frontend	React.js, Next.js, Tailwind CSS, HTML5, CSS3, Vite, SPA Development
Backend	Node.js, Express.js, REST APIs, Socket.IO, JWT, OTP Auth, bcrypt
Database & Cloud	PostgreSQL, MongoDB (NoSQL), SQL, Firebase (Auth, Firestore, Storage)
DevOps & Tools	Docker, CI/CD, Git, GitHub Actions, Vercel, Render, Postman, Gemini API, Whisper API

Experience

Software Developer Intern **Apr 2026 to Jun 2026**
Yuga Yatra Retail (OPC) Pvt. Ltd. Intern ID: 280400768 *Remote*
– Built and shipped client-facing web modules using Cursor AI and Firebase Studio, driving project success through active cross-functional collaboration.
– Developed responsive retail-tech interfaces with modern UI/UX patterns; reduced development iteration time by 40% via AI-assisted workflows.

Projects

TaskFlow - Real-Time Task Management Platform **Live Application | Source Code | May 2026**
– **Tech:** TypeScript, MongoDB, Express.js, React.js, Node.js, Socket.IO, Docker, JWT
– Architected a real-time multi-team task management platform with a WebSocket-powered Kanban board (Socket.IO).
– Designed a multi-tenant MERN backend with workspace-level data isolation, JWT-secured APIs, and bcrypt password hashing.
– Achieved sub-100ms Socket.IO sync latency and deployed with zero-downtime on Vercel and Render via a Dockerized CI/CD pipeline using GitHub Actions.

Present AI - AI Presentation Evaluator **Live Application | Source Code | Jun 2026**
– **Tech:** React 18, Firebase, Gemini API, Whisper API, MediaPipe, FFmpeg
– Built an AI-powered video analysis platform scoring confidence, speech clarity, eye contact, and facial expression.
– Designed an end-to-end data pipeline combining FFmpeg audio extraction, Whisper STT, filler word detection, MediaPipe face and eye-contact analysis, and emotion recognition.
– Integrated the Gemini API to generate personalized, score-driven coaching feedback for each presenter.

Green Valley Poultry Farm - E-Commerce Platform **Live Application | Source Code | Apr 2026**
– **Tech:** Next.js, React.js, Node.js, PostgreSQL, Express.js, Razorpay, JWT, OTP Auth
– Developed a full-stack e-commerce platform with OTP-based passwordless authentication and sub-second REST API response times.
– Improved frontend performance by 35%+ via SPA architecture, lazy loading, and database optimization pipelines.
– Integrated Razorpay and UPI payment gateways, and built an admin inventory dashboard that reduced manual effort by 50%.

Certifications

Anthropic: Prompt Engineering & Claude API; Model Context Protocol (MCP) & Agent Skills (2026) | **Simplilearn:** Machine Learning Using Python; Intro to Generative AI (2026) | **IBM SkillsBuild:** Cybersecurity (2026)

Leadership & Activities

Peer Mentor, CodeBird Coding Club: Guided 20+ students in DSA & MERN stack through workshops and 1:1 mentorship sessions | **Hostel Representative:** Managed logistics & events for 100+ students | **NSS Volunteer:** Participated in community service & rural development programs
